

Pen Tube Insertion Tool

PKTINT

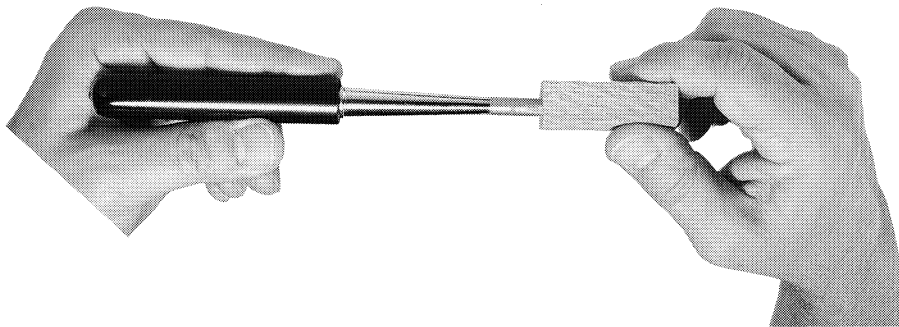

This tool can be used to aid in the insertion and gluing of pen tubes between 7 mm and 11 mm. Simply place the pen tube over the end of the tool and cover with your choice of glue. Be sure to cover the entire surface, leaving no bare spots. Slide the tube inside your pen blank with a twisting motion, while still on the tool. Slowly release the tool from the tube inside the blank, making sure the tube is centered. Allow your work to dry the prescribed time.
