III. HAZARDS IDENTIFICATION

Routes of Entry: Eye contact, Inhalation, Skin contact, None Known.
Medical Conditions Aggravated: Kidney disease, Eye disease, Skin disease including eczema and sensitization. Respiratory disease including asthma and bronchitis. No medical conditions affected by exposure. Digestive tract disease, Liver disease.

Immediate (Acute) Health Effects

Inhalation: Can cause severe central nervous system depression (including unconsciousness). No hazard in normal industrial use. Causes respiratory tract irritation. Can cause severe respiratory irritation, dizziness, weakness, fatigue, nausea, headache and possible unconsciousness.

Skin Contact: Moderately irritating to the skin. Can cause moderate skin irritation, defatting, and dermatitis. Not likely to cause permanent damage.
Eye Contact:
Can cause irritation. Can cause severe irritation. Eye contact may result in corneal injury. Symptoms may include discomfort or pain, excess blinking and tear production, with marked redness and swelling of the conjunctiva. Temporary vision impairment (cloudy or blurred vision) is possible.

Skin Absorption:
Can be absorbed through the skin but exposure must be extensive before adverse health effects occur. A single exposure is unlikely to result in the product being absorbed through the skin in harmful amounts. Toxic and may be harmful if absorbed through the skin; may produce target organ damage. Minimal hazard in normal industrial use. May cause gastrointestinal discomfort.

Ingestion:
Aspiration of material into the lungs can cause chemical pneumonitis which can be fatal. May cause vomiting. Irritation to mouth, throat, and stomach. Can cause abdominal discomfort, nausea, vomiting, and diarrhea.

Target Organ Acute Toxicity:
| Stoddard solvent | Skin, eyes, CNS, respiratory system, kidneys |
| Ethyl benzene    | Eyes, respiratory system, skin, CNS          |
| p-Xylene         | CNS, eyes, brain, liver, kidneys, skin, GI tract, respiratory system |
| o-Xylene         | CNS, eyes, brain, liver, kidneys, skin, GI tract, respiratory system |
| m-Xylene         | CNS, eyes, brain, liver, kidneys, skin, GI tract, respiratory system |

Long-Term (Chronic) Health Effects:

Carcinogenicity:
ACGIH, IARC, NIOSH, NTP, OSHA. Contains a substance that is a probable cancer hazard based on human studies.

Reproductive and Developmental Toxicity:
A component in this product has been shown to cause birth defects and reproductive disorders in laboratory animals in doses that could be encountered in the workplace. No data.

Mutagenicity:
No data available to indicate product or any components present at greater than 0.1% is mutagenic or genotoxic.

Inhalation:
Upon prolonged and/or repeated exposure, can cause severe respiratory irritation, dizziness, weakness, fatigue, nausea, headache, and possible unconsciousness.

Skin Contact:
May cause lingering effects but is not likely to result in permanent damage if the exposure is eliminated. Upon prolonged or repeated contact, can cause moderate skin irritation, dermatitis, and dermatitis but is not likely to cause permanent damage.

Eye Contact:
Upon prolonged or repeated contact, can cause severe irritation. Eye contact may result in corneal injury. Symptoms may include discomfort or pain, excess blinking and tear production, with marked redness and swelling of the conjunctiva. Temporary vision impairment (cloudy or blurred vision) is possible.

Skin Absorption:
Contains methanol. Upon prolonged or repeated exposure, may cause deterioration of the optic nerve if large quantities are absorbed through the skin. Repeated absorption of large quantities may lead to blindness. Upon prolonged or repeated exposure, minimal hazard in normal industrial use. May cause gastrointestinal discomfort.

Target Organ Chronic Toxicity:
Kidneys, Eyes, Skin, Nervous System, Respiratory Tract, Digestive Tract, Liver, Blood.
Supplemental Health Hazard Information: No additional health information available.

IV. FIRST AID

Inhalation: Remove to fresh air. Get medical attention immediately. Have a trained individual administer humidified oxygen. If not breathing, give artificial respiration.

Eyes: Immediately flush eyes with plenty of water for at least 20 minutes. Retracting eyelids often. Tilt the head to prevent chemical from transferring to the uninvolved eye. Get immediate medical attention and monitor the eye daily as advised by your physician.

Skin Contact: Wash with soap and water. Remove contaminated clothing and launder. Get medical attention if irritation develops or persists.

Ingestion: Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS.

Notes to MD: No additional first aid information available.

V. FIRE FIGHTING MEASURES

Flammability Summary:

- Flash Point: 125°C (CALC.) °F
- Upper Flammable/Explosive Limit, % in air: 6.0 @ 77°F
- Lower Flammable/Explosive Limit, % in air: 1.1 @ 77°F

Fire Hazards: Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back.

Extinguishing Media: Alcohol foam Use alcohol resistant foam, carbon dioxide, or dry chemical extinguishing agents. Water may be ineffective but water spray can be used extinguish a fire if swept across the base of the flames. Water can absorb heat and keep exposed material from being damaged by fire.

Fire Fighting Instructions: Flammable component(s) of this material may be lighter than water and burn while floating on the surface. Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location using the potential of hazardous vapors and decomposition products.

Hazardous Combustion Products: Carbon dioxide, Carbon monoxide

VI. ACCIDENTAL RELEASE MEASURES

Health Consideration for Spill
Response: No health affects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section VIII of this MSDS

Spill Mitigation Procedures
General Methods: No special spill clean-up considerations. Collect and discard in regular trash.
VII. HANDLING AND STORAGE

Handling: Follow all protective equipment recommendations provided in Section VIII. Use spark-proof tools and explosion-proof equipment. Mildly irritating material. Avoid unnecessary exposure.

Storage: Keep away from sources of ignition. Store in a cool dry place away from ignition sources. Store in a cool dry place. Isolate from incompatible materials.

VIII. ENGINEERING CONTROLS AND PERSONAL PROTECTIVE EQUIPMENT

Engineering Controls: Check ventilation codes. Local exhaust ventilation or other engineering controls are normally required when handling or using this product to avoid overexposure.

Protective Equipment

Respiratory Tract: Respirators should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (Z88.2-1992). A written respiratory protection program, including provisions for medical certification, training, fit testing, exposure assessments, maintenance, inspection, cleaning, and convenience, sanitary storage should be implemented.

Eyes: Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available.

Skin: Avoid skin contact by wearing chemically resistant gloves, an apron and other protective equipment depending upon conditions of use. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work.

XII. ECOLOGICAL INFORMATION

Overview (for ingredients): No data available. This material is not expected to be harmful to the ecology.

XIII. DISPOSAL CONSIDERATIONS

Waste Description for Spent Product: The waste may be a characteristic hazardous waste. Spent or discarded material is a hazardous waste.

Disposal Methods: Comply with all Local, State, Federal, and Provincial Environmental Regulations. Dispose of by incineration following Federal, State, Local, or Provincial regulations.

Potential EPA Waste Codes: If discarded, this product is considered a RCRA ignitable waste, D001.

Components Subject to USEPA Land Disposal Restrictions:
- Ethyl benzene 100-41-4
  - 1.25 %
