

1" Dust Brush Kit

Kit Features:

- Two parts - easy to assemble
- Useful for many applications from shop to house
- Durable nylon bristles
- Exposed brush length: 4"

Required Accessories:

- 1" Forstner Bit (#FB1)
- Drive center (#LCENTSS21 or #LCENT3258)
- 60 Degree heavy duty live center (#LCENTLT2)
- 2 Part Epoxy Glue (#PKGLUE2) or Insta Cure (Cyanoacrylate) Glue
- Spindle Blank: Minimum Size: 1-1/2" Square x 10" to 12"L

Preparing and Turning the Blank:

- Mark the center of each end of the blank.
- Drill a 1" hole, 1/2" deep at one end of the blank.
- Insert a drive center into the spindle of the lathe.
- Mount the blank over the drive center, through the 1" hole.
- Bring the tail stock with the live center inserted in the center hole of the blank for support. Lock in place.
- Turn the blank to a handle profile of your choice.
- Maintain the support end until the balance of the handle is complete, including final sanding and finishing.
- Part the wood at the handle's end, and finish the tip by hand off the lathe.
- Use either epoxy or CA glue, squeeze into the opening. Insert the brush base and let dry.
- The Utility Brush is ready to use.
