- 1-1/2" x 1-1/2" by 4" Blank
- 7mm Pen Mandrel
- Wooden Jam Bushing Set #PKGCALL2BU
- 60° Heavy Duty Live Center
- 5/8" Spade Drill Bit #PKSB58

### KIT COMPONENTS

- A. Plastic Body
- B. Mouse Squeaker
- C. Reed (Assembled & Tuned)

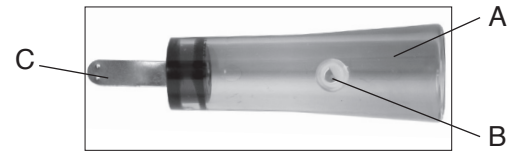

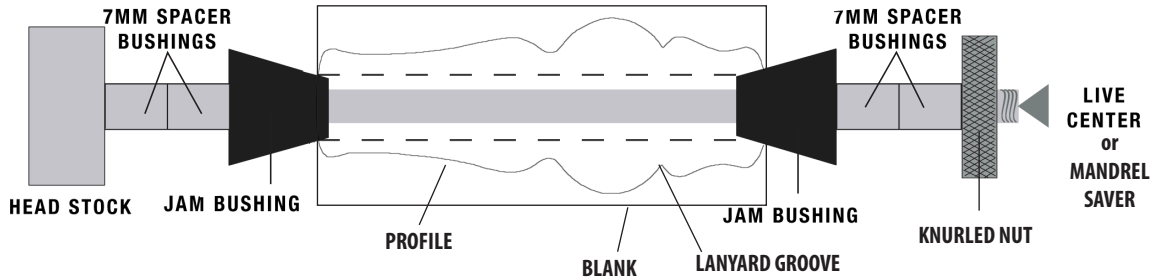

DIAGRAM A / PARTS LAYOUT

### DIAGRAM 'B' – TURNING THE BLANK

### Turning the Blank

Mount spacer bushings on the mandrel. Follow with a jam bushing, wide end in first. Insert the blank. Follow with another jam bushing narrow end in first. Insert spacer bushings and lock the set up in place tight. See Diagram 'B'. Turn the wood down to the profile of your choice. Cut a groove to affix the lanyard cord. Sand and finish the barrel with penetrating oil.

### Assembly

Insert the reed holder with a twisting motion into the opening in the body, past the 'O'-ring. Stop at the shoulder. Affix the lanyard into the groove, secure into place.

### How to use call

Lure them in close from far away with longer range screams. Place the call in the web of your hand between the thumb, and index finger cupped loosely to easily reproduce the sounds of a distressed rabbit, and finish the job with a mouse squeaker/rodent coaxer by imitating a field mouse in distress (block the exhaust end, and blow a wavering series of wimpers - waah waah waah)
