DIAGRAM A - Parts List

Preparing the Blank

- Cut Blanks to the size of the brass tube (add 1/16" for trimming)
- Drill 7mm holes through blanks
- Glue a tube inside each blank
- When glue dries, use a 7mm barrel trimmer to square the ends.
Trim the wood down flush to the brass tube

DIAGRAM B - Turning the Blanks

Turning The Blanks

- Mount the bushings and blanks onto the mandrel according to diagram 'B'.
- Turn the wood down close to the size of the bushings. Sand the wood down to the bushing diameter
- Finish the wood with your choice of polish.

Assembly

NOTE: Layout Finished parts according to Diagram A

- Press the tip coupler, recessed end in first, into the smaller diameter of the lower barrel.
- Press the center band, recessed end in first into the opposite end of the lower barrel.
- Press the exposed end of the center band into the wide end of the upper barrel.
- Insert the clip onto the projection on the end cap. Press into the smaller diameter of the upper barrel
- Insert and slide the pencil mechanism through the opening at the end cap until the threads shows through.
- Thread on the tip assembly, tight
- To feed the lead, just click on the plunger gently.
- To reload the pencil. remove the plunger/eraser and drop a maximum of 4 new lead sticks inside
- To use the eraser, just remove the plunger to expose the eraser
