

Click Retainer Assembly Tool

For Roller/Fountain pens with click closure retainer

This tool is designed to ease in adjusting the space between the upper and lower ends of the pen and achieve a perfect click closure.

- Assemble and press all pen components except the retainer.
- Drop in the retainer, narrow end first into the opening in the upper cap.
- Insert the adjusting tool into the opening.
- Seat the tool into the retainer and turn clockwise.
- The retainer will screw onto the stud inside. Continue with a few turns.
- Test the closure with the lower end.
- The pen is complete when both ends of the pen click when pushed together and there is no space between them.
- The cap will post over the lower end when in use with a click and no space.
