

## MOTOR MOUNTING TEMPLATE

Use this template to determine whether or not the #TCLVSKIT will adapt to your lathe

*(Note actual template/motor mount is steel)*

Cut out and position where your motor is currently mounted.

1. This mount may replace your existing mounting plate or...
2. Mark the plate patterns to re-drill your existing plate.

If this mount or hole pattern fits your lathe then it is most likely that the #TCLVSKIT will fit your lathe.
